

# SOLALLIS BIO

New era of mesenchymal stem cell (MSC) therapy pioneered by AI and culture medium

## Researcher

- Experience
- Steady experiments

## AI technology

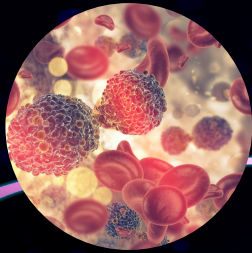

- Cell morphology
- Metabolic balance
- Proliferation rate

**4x faster development**  
**New formulation design**

## Providing innovative value for MSC culture media

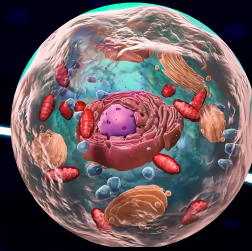

### SAFETY

Reducing infection risk from medium  
No animal ingredients

### EFFECT

Unique cell library using AI technology

### COST

Short time, less medium  
More cells, good cells

## AOF (Animal and human Origin Free) Platform

Being AOF is the basis for designing a "medium that produces good cells." AOF media has the following advantages compared to animal origin media such as serum or serum substitutes.

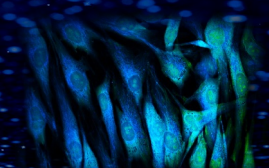

Easy to analyze with AI system

Flexible media formulation design

Excellent reproducibility

Good for exosome drug research
